

**Window Sealing Machine  
WPH 450**

For the production of liquid-proof packing with window.

Either as level indicator with scaling or as window to show the contents.

The latest H+S technology allows windowing of such beverage carton blanks at linear speeds with the production machines installed up- and downstream.

## Window Sealing Machine WPH 450

The machine can process carton or multiple layer materials with sealable inner coating.

The sealing formats to be processed can be adapted to the respective applications.

Automatic transfer stations can connect the sealing machine to the production machines installed up- and downstream.

Quality control with automatic ejection is integral part of the sealing machine.
